---

## Education

**Astana IT University** – Bachelor of Software Engineering (2023–2026), Astana, Kazakhstan

---

## Objective

To secure a position as an **Frontend Developer** where I can apply and develop my web development skills while contributing to exciting projects and gaining hands-on experience.

---

## Projects

**Household Goods Online Store** | React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap.

- Developed a responsive e-commerce website for selling household goods using React.js.
- Implemented product filtering, sorting, and category-based navigation for an improved user experience.
- Designed and integrated a shopping cart with add, remove, and quantity adjustment functionalities.
- Utilized React Router for seamless navigation between product details and cart pages.
- Managed application state using React hooks and Context API.

**Music Player Website with Scroll Effects** | React.js, JavaScript (ES6+), GSAP, HTML5, CSS3

- Developed an interactive music player website featuring smooth scrolling animations.
- Implemented synchronized animations using the GSAP library for an engaging user experience.
- Designed a visually appealing layout with dynamic UI elements that react to scrolling.
- Integrated audio playback functionality with play, pause, and track selection controls.

**Weather App with Dynamic UI and Real-time Data** | Vanilla JavaScript(ES6+), HTML5,CSS3.

- Developed a responsive weather application with a modern, glass-morphism inspired design.
- Implemented real-time weather data fetching using the OpenWeatherMap API.
- Created smooth animations and transitions for enhanced user experience using CSS3 animations.
- Designed an intuitive user interface with dynamic elements that react to user input and data changes.
- Integrated geolocation functionality for automatic local weather information.

---

## Skills

- **Frontend Development:** React.js, JavaScript (ES6+), HTML5, CSS3
- **UI/UX Design:** Responsive layouts, adaptive themes (light/dark mode), modern UI design
- **State Management:** React Hooks, Context API (basic knowledge)
- **Animations & Effects:** GSAP, CSS3 animations, smooth scrolling effects
- **API Integration:** Fetching and handling real-time data
- **Routing & Navigation:** React Router for seamless user experience
- **E-commerce Features:** Product filtering, sorting, shopping cart functionality
- **Version Control:** Git (basic knowledge)
- **Tools & Technologies:** VS Code, Figma, Chrome DevTools, Bootstrap, Prettier

---

## Achievements

**3rd Place**, International Olympiad in Applied Mathematics, Almaty (2022)

**Certificate of Completion in Android Development**, One Lab (2024)
